

*Versatile and handy
profile grinding machine*

*Precise grinding of rails and switches
Maneuverability and quick handling
Tilting Honda engine*

Your benefits

- Precise rail grinding after welding
- Possibility to grind the switches' frog by using the rollers extension (accessory)
- Quick machine setting the main type of rails (Flat bottom, grooved rail, bridge crane...) thanks to the 3 different rollers on the pivoting selector
- Easy maintenance scheduling thanks to the integrated hour meter
- Honda approved operation. Reliability and performance approved by Honda.

Drawing of grinding areas for MP6

Result after grinding

Specification

Engine	Honda GXR120
Engine output	2.7 kW (3.6 hp) 4,800 rpm
Mass	Approx. 56 kg (123 lbs)
Tilting range	Up to 90°
Total stroke of the grindstone	65 mm (2.6 in.)
Dimensions (L x W x H)	1,065 x 535 x 685 mm (42 x 21 x 27 in.)

Consumables and accessories

- Cup wheel grindstones (several dimensions available)
- Grindstones holder (several dimensions available)
- Rollers extension for switch's frog grinding
- Kickstand
- Grindstone cover and grindstone for grooved rail

Optional equipment

- Electric engine

Rollers rotation selector
