

HAND OPERATED HYDRAULIC WELD SHEAR

ESN2

USER-FRIENDLY

LOW
MAINTENANCE

FOR ALL
ENVIRONMENT

BENEFITS

- **Easy to set up**, the hydraulic hand operated **weld shear efficiently** shears any excess material on various types of rail
- The weld shear ESN2 is suitable for **different environments** such as traditional networks, mining, sidings, tunnels, harbours...
- Together with **Geismar knives**, weld shear ESN2 provides you high number of cuts without resharpener or replacing, ensuring **economic** usage over years
- **Perfect and accurate cut** ensures that minimal grinding is required after shearing
- **Sturdy**, hence **long lasting**, very limited number of spare parts is required during the lifespan of the machine guaranteeing **simplicity and low maintenance**

TECHNICAL DATA

| | |
|---------------------------------|-----------------------------------|
| Engine(s) | Double acting hydraulic hand pump |
| Maximum working pressure | 145 bars / 2,100 psi |
| Stroke of cutters | 140 mm / 6 in. with the blades |
| Type of rails | Most of flat bottom rail profile |
| Mass | 65 kg / 143 lbs without blades |
